## EDUCATION

### Full Stack Web Development

Masai School

July 2022 - November 2023

### BCA

IGNOU

June 2024 - June 2027

## TECHNICAL SKILLS

Node.js | RESTful APIs | MongoDB | Express.js |  
Git | JavaScript | MySQL | Docker

## SOFT SKILLS

- Critical Thinking
- Teamwork
- Adaptability
- Problem Solving

## INTERESTS

Music | Exploring | Classical Music

## PROFESSIONAL SUMMARY

Software developer with a passion for space exploration, specializing in AI-driven solutions and real-time communication systems. Currently developing AI chatbots, voice call systems, and automation tools at Polar AI using Node.js, Express, LangChain, and OpenAI technologies. Successfully launched and maintain live production applications including AI Voice Assistant, FormPilot, and CountdownShare, serving real users daily. Proven expertise in building scalable SaaS products from scratch with payment integrations and delivering innovative solutions that enhance productivity.

## WORK EXPERIENCE

### Polar AI

#### Full Stack Web Developer

September 2024 - present

##### Job responsibilities:

- At Polar AI, worked on optimizing AI-driven chatbots for web and email platforms. Used technologies like Node.js, Express, LangChain, Pinecone, and OpenAI embeddings. Played a key role in transitioning the product to a SaaS model and training new team members.
- Developed the AI call system from scratch for inbound and outbound real-time communication, enabling seamless voice interactions.
- Converted a custom product to a SaaS model, enabling clients to start using the service and contact the team for customizations.
- Built web chat, email chatbots, and AI agent automation from scratch as part of the SaaS offering.

### Cointab

#### Software Development Engineer

March 2024 - June 2024

##### Job responsibilities:

- Managed feature development and bug fixing, ensuring high code quality and product reliability.
- Collaborated closely with cross-functional teams to implement new features effectively.
- Conducted thorough manual testing to deliver stable products and ensure seamless user experiences.
- Resolved bugs efficiently, contributing to improved system performance and customer satisfaction.

## PROJECTS

### 1. AI Voice Assistant | [Live](#)

JavaScript | Node.js | Express.js | RazorPay | Chrome Extension

- Developed a voice-activated AI assistant for instant answers without leaving browser tab, perfect for interviews, exams, coding, and productivity.
- Implemented voice-to-text AI, screen reading mode, and web search integration for lightning-fast responses.
- Built customizable keyboard shortcuts and multi-device support for seamless user experience.
- Integrated AI models to provide 200+ free AI calls with no credit card required, ensuring privacy-focused design.
- Optimized real-time performance to help developers, students, and professionals improve their productivity daily.
